Beginner Data Scientist Student Azure Machine Learning

Data is the foundation of machine learning. In this module, you will learn how to work with datastores and datasets in Azure Machine Learning, enabling you to build scalable, cloud-based model training solutions.

Learning objectives

- Create and use datastores in an Azure Machine Learning workspace.
- Create and use datasets in an Azure Machine Learning workspace.

[Start >](#)[⊕ Save](#)

Prerequisites

- Knowledge of Python
- Experience of training models using the Azure Machine Learning SDK

This module is part of these learning paths
