

Exercise - Deploy a model as a real-time service

20 minutes

Now it's your chance to use Azure Machine Learning to deploy a machine learning model as a real-time service.

In this exercise, you will:

- Train and register a model.
- Deploy the model as a real-time service.
- Consume the deployed service.

Instructions

Follow these instructions to complete the exercise:

1. If you do not already have an Azure subscription, sign up for a free trial at <https://azure.microsoft.com> .
2. View the exercise repo at <https://aka.ms/mslearn-dp100> .
3. If you have not already done so, complete the **Create an Azure Machine Learning workspace** exercise to provision an Azure Machine Learning workspace, create a compute instance, and clone the required files.
4. Complete the **Create a real-time inference service** exercise.
