

Summary

1 minute

Microsoft Azure provides a range of technologies for storing relational and non-relational data. Each technology has its own strengths, and is suited to specific scenarios.

In this module you have learned how to:

- Identify how data is defined and stored
- Identify characteristics of relational and non-relational data
- Describe and differentiate data workloads
- Describe and differentiate batch and streaming data

Learn more

- [Introduction to Azure SQL Database](#)
- [Introduction to Azure Blob storage](#)
- [Introduction to Azure Cosmos DB](#)
- [Description of the database normalization basics](#)
